PROFILE

Data Science Master's student with experience in business analytics, reporting, and process optimization. Skilled in SQL, Python, and Power BI to analyze data, automate workflows, and support data-driven decision-making. Strong interest in business process digitalization, reporting systems, and data-driven operational improvement.

PROFESSIONAL EXPERIENCE

Witmates Technologies, Software Developer Intern 06/2024 – 09/2024 | Indore, India

- Developed SQL-based reporting solutions to support business monitoring and control processes
- Automated data extraction and transformation workflows to improve reporting efficiency
- Analyzed business data to identify process inefficiencies and optimization opportunities
- Ensured data quality and consistency for reliable reporting and decision-making
- Implemented data validation and cleaning processes to ensure accuracy and traceability of analysis

Gammastack, Software Developer Intern 11/2023 – 06/2024 | Indore, India

- Analyzed user and product data using SQL to identify usage patterns and behavioral trends
- Processed and transformed structured data to support analytical workflows and backend systems
- Conducted exploratory data analysis to generate insights on user engagement and system performance
- Integrated API-based data sources into analytics pipelines to enable structured reporting

SKILLS

Programming & Analysis: Python (Pandas, NumPy), SQL	Data Analysis: KPI Analysis, EDA, Data Cleaning, Data Validation	BI & Visualization: Power BI, Excel (Pivot Tables, Charts), Plotly, Streamlit	Databases: PostgreSQL, MySQL
Data Engineering: ETL Pipelines, API Data Processing(JSON)	Tools: Git, Postman, Docker		

EDUCATION

M.Sc. Data Science, Hochschule Fulda 10/2024 – Present | Fulda, Germany

B.Tech. Cloud Technology & Information Security, Mediacaps University 06/2020 – 07/2024 | India

PROJECTS

Power BI Sales & KPI Reporting Dashboard

- Developed interactive Power BI dashboards using SQL datasets and KPI metrics
- Connected multiple data sources and transformed datasets for reporting
- Designed slicers, filters, trend visuals and executive summaries
- Automated recurring reporting workflows

SpendSense AI – Expense Analytics System, Data Science Developer (Project)

- Developed a data-driven expense analytics system to analyze user spending behavior and financial trends
- Built data pipelines to aggregate and transform transaction data for real-time analysis
- Created interactive dashboards to track KPIs and simulate financial scenarios
- Designed APIs to support structured data workflows and scalable analytics processing
- Analyzed financial transaction data to identify spending patterns and behavioral trends• Built reporting logic similar to financial dashboards for tracking expenses and category-level insights

LANGUAGES

English Fluent	German A2(actively improving)
--------------------------	---

INTERESTS

- AI-driven analytics and SaaS products
- Market intelligence and data-driven strategy
- Data pipeline development and scalable analytics systems
